

Oregon OSHA consultation services

No cost, confidential worksite evaluations

Department of Consumer
and Business Services

Oregon OSHA's consultants specialize in occupational safety, health, and ergonomics — and are available to come to your worksite to conduct a confidential evaluation, at no cost to you!

Oregon OSHA consultation provides many free, confidential services, including:

- Workplace safety and health hazard assessments
- Recommendations to control and eliminate hazards
- Industrial hygiene services, such as noise monitoring and air sampling
- Ergonomic services to help reduce overexertion injuries, such as carpal tunnel syndrome and lower back strains
- Written program evaluation
- Hands-on training on health and safety topics
- Safety and health management program assistance
- Answers to your questions about Oregon OSHA standards

Oregon OSHA consultants will NOT:

- Issue citations or propose penalties for violations of OSHA standards
- Provide other businesses with information about your Oregon OSHA participation, hazards, or business processes
- Guarantee that your workplace will “pass” an Oregon OSHA inspection

What will the consultant want to see?

- If you request a comprehensive consultation, the consultant will conduct an evaluation of the physical worksite, and then review your records, written programs, and your safety and health management plan.
- If you request a specific consultation, the consultant can focus on a specific operation, machine, or process at your worksite. You are in charge!

What are my obligations after a consultation?

Following an Oregon OSHA consultation, you will receive a report listing any hazards identified, along with our recommendations for corrections. Oregon OSHA encourages you to correct the hazards to make your worksite a safe place for your employees. If a consultant identifies an “imminent danger” situation, you must take immediate action to protect all employees.

Benefits for you

This free service will help you eliminate or control hazards specific to your workplace, and you will likely experience:

- Fewer injuries and illnesses
- Improved productivity
- Reduced workers' compensation costs
- Improved employee morale

" Oregon OSHA's visit was 100 percent value creation for a company like ours. Keeping our staff safe is crucial to our success, so getting free and – above all – such valuable and actionable advice is supporting our goals."

Anders Nancke-Krogh
Chief technology officer, Plover Inc.
