Class Descriptions

All classes are 4 hours unless otherwise specified.

Attending an Oregon OSHA class helps you gain important knowledge and skills. The certificate should not be considered formal Oregon OSHA certification of professional competencies or qualifications.

Hazard Communication – Aligned with GHS

You will learn how to: write a hazard communication program; complete a chemicals list; conduct employee training; and analyze container labels and Safety Data Sheets (SDS). This how-to workshop guides you through developing and implementing an effective hazard communication program.

Hazard Identification and Control

You will learn about the types of workplace hazards; hazard correction; developing an inspection checklist for the walk-around inspection; and writing an effective safety inspection report. This class builds on the introduction in class Safety Meetings and Committees.

Job Hazard Analysis (JHA)

You will learn how to determine which jobs need a JHA; write an effective safe job procedure; and use the JHA to improve safety programs. Conducting JHAs is required for all companies intending to achieve Safety and Health Achievement Recognition Program (SHARP) certification.

Safety and the Supervisor

You will learn about costs and benefits of taking corrective action; the five general safety supervision responsibilities outlined in OSHA rules. Through class discussion and group exercises, you learn about leadership that supports safe behaviors and conditions.

Safety Meetings and Committees

This introductory class discusses the role and purpose for the safety meeting and/or committee; employer and employee responsibilities; and safety committee training requirements.

Worker Protection Standard

You will learn about: the worker protection standard; effective training and information for pesticide handlers and workers.
