Oregon OSHA - Adopted Changes Federal OSHA Amendments to Cranes and Derricks In Construction: Underground Construction and Demolition

This rulemaking is to keep Oregon OSHA in harmony with recent changes to federal OSHA's standards.

Oregon OSHA amended 29 CFR 1926.800 Underground Construction, in Division 3/S; 1926.856 Removal of walls, floors, and material with equipment, in Division 3/T; and 1926.858 Removal of steel construction, also in Division 3/T, with changes as published in the **April 23, 2013 Federal Register**. With this rulemaking, Federal OSHA has clarified text in the demolition standard and applies the cranes and derricks standard to underground construction work and demolition work.

Oregon OSHA repealed 437-003-0080 Wind Velocity Device. We inadvertently left this rule in the former Division 3/DD. Subdivision DD was removed in Oregon earlier this year with rulemaking from the August 17, 2012 Federal Register. The substance of 437-003-0080 is addressed now in Cranes and Derricks in Construction, subdivision CC.

Oregon OSHA makes the amendments from the April 23, 2013 Federal Register in construction, Division 3/S and 3/T.

This is Oregon OSHA Administrative Order 6-2013, **adopted and effective October 9, 2013**.
