Oregon OSHA consultation services

No cost, confidential worksite evaluations
Oregon OSHA’s consultants specializing in occupational safety, health, and ergonomics are available to come to your worksite to conduct a confidential evaluation of all or part of your worksite. The best part is that it all comes at no cost to you!
Oregon OSHA consultation provides many no-cost, confidential services, including:

- Workplace safety and health hazard assessments
- Recommendations to control and eliminate hazards
- Industrial hygiene services, such as noise monitoring and air sampling
- Ergonomic services to help reduce overexertion injuries, such as carpal tunnel syndrome and lower back strains
- Written program evaluation
- Hands-on training on health and safety topics
- Safety and health management program assistance
- Answers to your questions about Oregon OSHA standards
Oregon OSHA consultants will NOT:

• Issue citations or propose penalties for violations of OSHA standards
• Provide other businesses with information about your Oregon OSHA participation, hazards, or business processes
• Guarantee that your workplace will “pass” an Oregon OSHA inspection
What will the consultant want to see?

• If you request a comprehensive consultation, the consultant will conduct an evaluation of the physical worksite, and then review your records, written programs, and your safety and health management plan.

• If you request a specific consultation, the consultant can focus on a specific operation, machine, or process at your worksite. You are in charge!
What are my obligations under a consultation?

When you request an Oregon OSHA consultation, you will receive a report listing the hazards identified along with our recommendations for corrections. Oregon OSHA encourages you to correct the hazards to make your worksite a safe place for your employees. If a consultant identifies an “imminent danger” situation, you must take immediate action to protect all employees.

Benefits for you

The result of this no-cost service will help you eliminate or control hazards specific to your workplace resulting in:

- Fewer injuries and illnesses
- Improved productivity
- Reduced workers’ compensation costs
- Improved employee morale
"Oregon OSHA’s visit was 100 percent value creation for a company like ours. Keeping our staff safe is crucial to our success, so getting free and – above all – such valuable and actionable advice is supporting our goals very much."

Anders Nancke-Krogh
Chief technology officer, Plover Inc.
