- 5/9/2024 8am Forklift Safety
- 5/9/2024 1pm Lockout / Tagout
All classes are scheduled for 4 hours unless otherwise specified.

Attending an Oregon OSHA class helps you gain important knowledge and skills. The certificate should not be considered formal Oregon OSHA certification of professional competencies or qualifications.

**Accident Investigation**
You will learn about: why investigations are important and the process for conducting an accident investigation. This how-to class builds on the basic introduction into the role and purpose of Safety Meetings and Committees.

**Bloodborne Pathogens**
You will learn about: the bloodborne pathogens rule and written exposure control plan. Topics will include basic information about routes of exposure, disease processes, control measures, and training requirements.

**Fall Protection**
This class will discuss the Oregon OSHA rules for fall protection use in the construction industry and will provide specific tools to build a pro-active safety program. Falls are consistently one of the top ten injuries in Oregon and cost employers millions of dollars each year. The goal of the class is to increase personal knowledge about how to prevent falls.

**Forklift Safety**
You will learn about the Oregon OSHA rules for Powered Industrial Trucks and developing a forklift training program. This class does not offer forklift operator certification (cards).  

**Hazard Communication – Aligned with GHS**
You will learn how to: write a hazard communication program, complete a chemicals list, conduct employee training, and analyze container labels and Safety Data Sheets (SDS). This how-to workshop guides you through developing and implementing an effective hazard communication program. Provides 3 credits toward recertification of Oregon certified pesticide applicator licenses.

**Hazard Identification and Control**
You will learn about: the types of workplace hazards, hazard correction, developing an inspection checklist for the walk-around inspection, and writing an effective safety inspection report. This class builds on the hazard identification and hazard control modules that are included in Oregon OSHA’s introductory class Safety Meetings and Committees.

**Hearing Conservation Program**
You will learn about: the elements of an effective hearing conservation program, what actions can be taken to prevent hearing loss, and signs that noise could be harming hearing.

**Job Hazard Analysis (JHA)**
You will learn how to: determine which jobs need a JHA, write an effective safe job procedure, and use the JHA to improve safety programs. Conducting JHAs is required for all companies intending to achieve Safety and Health Achievement Recognition Program (SHARP) certification.

**Lockout/Tagout and Machine Safeguarding**
This two-part workshop reviews the requirements found in the Oregon OSHA rules, the Control of Hazardous Energy (Lockout/Tagout), and Machinery and Machine Guarding.

**Lockout/Tagout**
You will learn about the purpose and scope of the lockout/tagout standard: lockout and tagout procedures; training criteria; and periodic inspection criteria.

**Machine Safeguarding**
You will learn about Oregon OSHA machine guarding requirements; hazardous motions and actions; guards and devices; and training guidelines.

**OSHA 300 Recordkeeping**
You will learn about: reporting requirements, how to fill out the OSHA forms, determine if an injury or illness should be recorded, evaluate the form, and recognize injury trends and root causes.

**Root Cause Analysis**
You will learn about several root cause analysis tools and their application in the accident investigation process. A walk-through of an example root cause analysis will be presented.

**Safety and Health Management Principles**
You will learn: why a safety and health management system is important, become familiar with the 7 core elements of an effective safety and health management program, and learn about best practices and overcoming obstacles.

**Safety and the Supervisor**
You will learn about: costs and benefits of taking corrective action, and the five general safety supervision responsibilities outlined in the Oregon OSHA rules. Through class discussion and group exercises, you learn about leadership that supports safe behaviors and conditions.

**Safety Leadership**
You will learn about the concept of leadership, leadership styles, applying effective recognition and discipline, developing trust and credibility. Emphasis is on applying leadership to reduce or eliminate safety hazards. This workshop benefits members of the safety committee.

**Safety Meetings and Committees**
This introductory class discusses the role and purpose for the safety meeting and/or committee; employer and employee responsibilities; and safety committee training requirements.

**What to Expect from an Oregon OSHA Inspection**
You will learn about: Oregon OSHA services, employee/employer and compliance officer rights and responsibilities; and how and why inspections are conducted. This class helps take the mystery out of the Oregon OSHA compliance inspection process.

**Worker Protection Standard**
Protection for Pesticide Handlers and Workers: You will learn about the Environmental Protection Agency’s (EPA) Worker Protection Standard (WPS), along with Oregon OSHA’s unique requirements related to the standard. The WPS applies to people who work on farms, in forests, nurseries, greenhouses, or other locations that use pesticides.
Public Education Workshop Schedule
Jan. - June 2024

All classes are scheduled for 4 hours unless otherwise specified.

Attending an Oregon OSHA class helps you gain important knowledge and skills. The certificate should not be considered formal Oregon OSHA certification of professional competencies or qualifications.

BEND
Oregon OSHA Field Office Training Room • 1230 NE 3rd St, Suite A-115, Bend, OR 97701 • 541-388-6068
The office is located on the ground floor at the corner of 4th and Lafayette in Red Oaks Square. Park on the street and look for Suite A-115. Additional parking available across the street.

EUGENE
Oregon OSHA Field Office Training Room • 1500 Valley River Dr, Ste 150, Eugene, OR 97401 • 541-686-7913
Follow I-5 S to Valley River Dr in Eugene. Take the exit toward Valley River Center/Willagillespie from Delta Hwy. Merge onto Valley River Dr. The building will be on the right.
*Free Parking Available.

KLAMATH FALLS
Klamath Community College • Work Skills Center Bldg. 8 Rm 820 • 7390 S 6th St, Klamath Falls, OR 97601 • 541-880-2253
From Hwy 97 North follow into Klamath Falls. Proceed to Hwy 39, Reno/Merrill. At the intersection of south 6th St, turn left and proceed to #7390. From Hwy 97 South follow to the Hwy 140 exit. At the stop sign, turn right. Follow the bypass until it intersects with Hwy 39. Turn left on south 6th St and proceed to #7390.
Park in the first parking lot as you enter campus from S. 6th St. The new Work Skills Center is the new building right next to it.

MEDFORD
Oregon OSHA Field Office • 1840 E Barnett Rd, Suite D, Medford, OR 97504-8293 • 541-776-6016
