

Partners helping distribute respirators in light of wildfire smoke emergency requirements

August 13, 2021

Oregon OSHA is working with several partners to distribute particulate respirators to employers to help protect their workers in light of their new obligations under an [emergency wildfire smoke rule](#).

While the state's supplies last, the particulate respirators are intended to be distributed to employers when wildfire smoke events trigger Oregon OSHA's emergency temporary rule. The maximum number of respirators allowed to be received is four per employee.

This list will be updated as more sites become available. The following is a current list of contact information for partners who are helping distribute respirators at certain locations:
