Oregon Occupational Safety and Health Division
Department of Consumer and Business Services

2019 Annual Performance Plan

July 17, 2018
INTRODUCTION

This Annual Performance Plan, for federal fiscal year 2019 (October 1, 2018 through September 30, 2019) describes how the Oregon Occupational Safety and Health Division (Oregon OSHA) will allocate its resources to conduct the activities tied to the specific goals contained in Oregon’s 5-year (2016-2020) Strategic Plan. The specific goals are:

Goal 1: Reduce serious workplace injuries and the risks that lead to them.

Oregon OSHA will continue the reduction in injuries and illnesses as measured by the Bureau of Labor Statistics, with the statewide DART rate being reduced to 2.0 per 100 workers (or less) and the statewide total case incidence rate being reduced to 3.7 per 100 workers (or less).

Goal 2: Reduce serious workplace illnesses and the risks that lead to them.

Oregon OSHA will establish a baseline measurement of severe chemical hazards identified and will increase such hazards identified (and therefore corrected) to at least 817 by the final year of the planning period.

Goal 3: Reduce workplace deaths and the risks that lead to them.

Oregon OSHA will accelerate the decline in Oregon workers compensation fatality rates, with the final three years of the planning period averaging 1.4 per 100,000 workers (or less), which will be a 10 percent decrease compared to the most recent three-year baseline period.

OVERVIEW OF OREGON OSHA

Administration of the Occupational Safety and Health Administration's (OSHA) approved comprehensive state plan for Oregon is vested in the Department of Consumer and Business Services (DCBS) by the Oregon Safe Employment Act of 1973 as amended through 2003. The plan encompasses all functions of the Oregon Occupational Safety and Health Division (Oregon OSHA). Oregon OSHA promulgates and enforces occupational safety and health regulations and provides technical information, education, consultations and training grants to promote safe and healthful working conditions for Oregon workers. While the bulk of activity in the Oregon State Plan is undertaken by Oregon OSHA, other divisions within DCBS contribute to the mission including the Central Services Division: Financial Services, and Information Technology and Research, Director's Office, and the Hearings Division of the Workers' Compensation Board. The Oregon Attorney General's Office and a portion of the Civil Rights Division of the Bureau of Labor and Industries also contribute to activities in the Oregon State Plan.
OREGON OSHA Mission Statement:

To advance and improve workplace safety and health for all workers in Oregon.

In 1973, the Oregon Safe Employment Act (OSEAct) was passed into law by the Oregon Legislature to ensure the occupational safety and health of workers in Oregon. The OSEAct states that “…every employer shall furnish employment and a place of employment which are safe and healthful for employees.” The Oregon Occupational Safety and Health division (Oregon OSHA) administers the OSEAct and enforces Oregon’s occupational safety and health rules. In 1987, the Oregon Legislature passed House Bill 2900 which increased worker protection and defined new areas of responsibility for employers and workers’ compensation insurance carriers. This included the establishment of a coordinated program of worker and employer education, health and safety consultative services and research to assist workers and employers in the prevention of occupational injuries and illnesses. In May 1990, the Oregon Legislature passed Senate Bill 1197. This landmark legislation, which was passed during a special session of the Oregon Legislature, made workplace injury and illness prevention a major component of workers’ compensation reform. This was accomplished, in part, by requiring joint management-labor safety committees in most places of employment and by a significant increase in Oregon OSHA staff.

Oregon OSHA’s primary objective is to improve occupational safety and health in workplaces throughout the state, thus reducing on-the-job injuries, illnesses and fatalities. This is achieved through enforcement of occupational safety and health rules, consultation and training assistance for employers and workers, and by providing adequate resources to effectively address Oregon’s loss prevention issues. Strong partnerships with labor groups, trade associations and other governmental agencies also significantly contribute to Oregon OSHA’s success.

All Oregon OSHA programs work cooperatively toward meeting the division’s mission and strategic objectives. Along with the Public Education and the Conference Section, Enforcement officers, technical specialists, and consultants produce technically accurate, high quality training to employers and employees. While the Oregon OSHA professional staff are technically trained in all areas of occupational safety and health, hazard identification, and accident investigation, the division has in-house experts specializing in specific industry needs. These specialists include construction, logging, and agriculture experts, as well as trained ergonomists. In addition, we have trained individuals to evaluate facilities that are covered under the Process Safety Management (PSM) standard.

Oregon OSHA is dedicated to assisting employers in achieving self-sufficiency in safety and health program management, including developing and implementing comprehensive safety and health plans. The elements of a successful plan include top management commitment, clearly defined labor and management accountability, employee and supervisor training, employee involvement in safety and health concerns, hazard identification and methods of control, accident and incident investigation procedures, and a periodic review of the plan itself.

Oregon OSHA will implement progressive occupational safety and health strategies as it strives to achieve its mission and the goals of the Strategic Plan. A comprehensive program will be used by Oregon OSHA to continue the declining trend in the rate of occupational injuries, illnesses and fatalities in Oregon.

This plan does not exempt Oregon OSHA from fulfilling its statutory and regulatory responsibilities. Oregon OSHA will continue to meet all the criteria in Section 18 of the Occupational Safety and Health Act and the implementation of the regulations contained in 29 CFR Parts 1902, 1908, 1952, 1953, and 1954. This plan sets forth the methods by which program effectiveness is determined.
The FY 2019 Annual Performance Plan is an integral part of the grant agreements between OSHA and Oregon OSHA which currently exist under Section 23(g) and 21(d) of the Act and 29 CFR 1952.104.

The primary method for tracking and evaluating progress toward meeting the performance goals established in this plan is one of self-evaluation by Oregon OSHA management staff. Oregon OSHA will meet quarterly with federal OSHA to continue the Oregon OSHA/OSHA partnership and to report progress toward strategic goals in a manner defined in the joint OSHA/OREGON OSHA Monitoring Plan. Oregon OSHA agrees that a specified number of inspections accompanied by a federal OSHA monitor will be conducted and that a specified number of Oregon OSHA inspection/investigation case files will be reviewed. A monitoring plan will be jointly prepared detailing the specific monitoring roles and activities of individual staff members as well as the mandated monitoring activities that federal OSHA will perform.

Note: This FY 2019 Annual Performance Plan includes updated FY 2014 baseline figures as they apply. FY 2019 data, as they apply establish baseline figures for the quarterly Annual Performance Plan report, FY 2016 through FY2020.
During CY 2017 an estimated 1,901,000 workers covered by Workers’ Compensation insurance were employed in Oregon with an estimated 119,600 employers. These employers operate at approximately 176,859 locations.

| 812 | Personal and laundry services | 15,054 | 2,168 |
| 813 | Membership organizations | 29,913 | 5,544 |
| 814 | Private households | 13,330 | 289 |
| GOV | State and local government | 258,334 | 7,774 |

2. Industries with 7,500+ employees.
4. Number of employing units represents the number of establishments or employer locations rather than the number of employers. Data compiled from the most current DCBS Employer Data System file does not include all possible locations. The methodology for estimating number of locations changed in 2009, making prior years’ estimates not comparable.
5. This category includes all state and local government units regardless of their industry classification.

IDENTIFICATION OF COVERED ISSUES

A flowchart, described on the following pages developed by the OSHA Portland Area Office, describes jurisdictional boundaries between OSHA and Oregon OSHA for occupational safety and health at private and public sector worksites. The chart included on the following page, addresses jurisdiction in diving, construction, shipyards, marine terminals, Indian reservations, and U.S. military reservations.

The Federal Register (49 CFR Part 221) "addresses jurisdictional issues arising with respect to the operations of common carriers in the general system of rail transportation." While the Federal Railroad Administration exercises jurisdiction over the safety of railroad operations, Oregon OSHA does have some jurisdiction over "non-rolling" stock.

The state has concurrent jurisdiction over mining with the USDOL, Mine Safety and Health Administration (MSHA), but chooses not to exercise jurisdiction if it subjects the employer to duplicate inspections by both agencies.

Oregon OSHA will continue to register farm labor camp housing and conduct field sanitation and farm labor camp housing inspections in 2019, and work cooperatively with federal Department of Labor to coordinate farm labor camp housing.

Legislative Activity affecting Oregon OSHA

Oregon OSHA has no new legislation activity to report.
* The following exceptions are noted:
Employment at DOE Albany Research Center – OSHA jurisdiction
Private employers within Crater Lake National Park – OSHA jurisdiction

</table>

### Notes:
- FTEs should be expressed in percentage of time allocated to 23(g) grant/agreement.
- Managers/Supervisors are now separated from First Line Supervisors. Managers/Supervisors are Administrative where First Line Supervisors are Program on the Cost Breakout Chart.
- For compliance officers, include all allocated or onboard positions or portions thereof, as appropriate, devoted to field enforcement activities (on-site, case documentation, informal conferences, and other CSHO-related activities).
- All information on this chart must correspond to the Organizational Chart and Object Class/Supportive Cost Breakout chart, and must not include personnel outside the 23(g) program.

1 Oregon OSHA has 18 Safety and 12 Health Consultants (100% state funded) who conduct both Private Sector and State/Local Government consultations. The FTE allocation is based on the projected FY 2019 consultation visits. (84% Private Sector, 16% State/Local Government).
STATEMENT OF COMPLIANCE WITH APPROPRIATIONS RIDERS

Oregon will comply with all current Congressional appropriation riders. However, firms prescribed by the Byron Amendment and small farms may be scheduled for inspection using state funds if the individual place of employment warrants inspection under the state's scheduling system.

The note preceding ORS 654, which limited state funding for small farm inspections, expired July 1, 1991. No legislation continued this limitation after that date. This allows the state to include small farms in the scheduling system as long as they are inspected by 100% state-funded compliance officers. Legislation passed in 1995 (HB 2541 and HB 3019) restricted small farm inspections. Administrative rules on inspection scheduling now provide for an inspection exemption, instead of an appropriation rider. All time credited to federally exempt inspections is charged 100% to state funds. The state will continue analysis of inspection data quarterly to track the Byron and small farm inspections.

The state will comply with all mandated activities under its State Plan Agreement, and will take no action during the term of this funding request that would impair the state in maintaining the core elements (mandated activities) listed in the OSH Act and as defined in 29 CFR 1902.

MANDATED ACTIVITIES
Oregon will pursue the goals outlined in this plan while assuring the following:

• Unannounced inspections, including prohibition against advance notice are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Employee access to hazard and exposure information, as well as other health and safety information are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Protection of employer's trade secrets.

• Employer record keeping, reporting, and posting requirements are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Legal procedures for compulsory process and right of entry are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Right of an employee representative to participate in the walk-around are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Timely response to complaints and right of an employee to review an Oregon OSHA decision not to conduct an inspection following a complaint.

• First instance sanctions are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.
• Abatement of potentially harmful or fatal conditions are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Prompt and effective standards setting and allocation of sufficient resources are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Counteraction of imminent dangers are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Protection against, and investigation of, discrimination are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

• Public employee coverage.

• Maintenance of a voluntary compliance program are among the activities which could be used to achieve the strategic goals of reducing serious workplace injuries, illnesses, deaths and the risks that lead to them.

*New participants* are those that become active during the fiscal year. The total number of participant is the number active at the end of the fiscal year, and includes all new sites from that year.

*Outreach participants* refers to estimated number of workers who directly participate in outreach activity.

*NOTE:* Fiscal year based on federal fiscal year.
Marketing

Oregon OSHA markets its consultation program through a variety of methods.

Oregon OSHA sponsors or co-sponsors seven to eight conferences annually. These events are used as an opportunity to market various Oregon OSHA services including consultation, public education, the resource center, and providing an informational booth at other conferences.

Oregon OSHA will continue to provide presentations at the request of employers. While the presentation topics vary, three of the most requested presentations are related to Fall Protection, Pesticides, and What to Expect from an Oregon OSHA Inspection.

Oregon OSHA is required by law to annually notify employers determined to be among the most unsafe places of employment, of the increased likelihood of inspection. The notification letter also encourages these employers to call Oregon OSHA for an on-site consultation of their safety and health program.

Oregon OSHA has coordinated with the Small Business Ombudsman to market to policy holders on the assigned risk plan, with experience modifications over 1.00. The national council on compensation insurance is providing data to Oregon OSHA quarterly.

Public service announcements are generally coordinated at the departmental level in DCBS. These announcements inform the public of the various consumer services provided by the department, including Oregon OSHA’s consultative services.

Oregon OSHA will continue to disseminate marketing brochures including industry specific brochures relating to consultation services. Outreach opportunities exist at employer conferences, speaking engagements, training workshops, and inspections.

Oregon OSHA reaches out to the Latino, Russian, and Vietnamese communities through the use of newspapers, radio media, magazines, and television public service announcements. We also do farm labor camp outreach during the summer and participate in multiple informative fairs/events and community presentations throughout the state.

Oregon OSHA publishes two to three press releases every month. Several times each year the agency uses press releases to target specific industries and inform them of the various services available from Oregon OSHA, including consultation. Other press releases include those announcing educational workshops, providing information on upcoming conferences, and publicizing employer achievements in the area of safety and health such as the Voluntary Protection Plan.

Oregon OSHA publishes two newsletters “Resource” published bimonthly and the “Forest Activities News” that is published occasionally to promote safety and health awareness by providing valuable information to employers and employees. These newsletters include information on recent incidents, safety notes, and information about what exemplary employers are doing to further safety and health in Oregon.

Oregon OSHA also maintains a website offering prioritized content to both employers and workers. The agency continues to increase its use of social media, including Facebook and Twitter to promote safety and health information and other services. For example, one recent Facebook campaign promoted online training courses that have been translated into Spanish, including all terrain vehicle (ATV) Safety, Safety Meetings and Committees.
2019 ANNUAL PERFORMANCE GOALS
**Strategies for Success**

- maintain its presence in the workplace, in relation both to enforcement and to onsite consultation.
- target educational, collaborative and enforcement efforts to protect workers in high-hazard industries and occupations.
- focus educational, collaborative and enforcement efforts on protecting particularly vulnerable and hard-to-reach worker populations.
- ensure that penalties are used more effectively as tools to promote compliance, both before and after a particular workplace has been inspected.
- ensure that employers who desire to provide a safe and healthy workplace have access to a wide range of educational tools, including on-site consultations.
- ensure that education, collaborative and enforcement efforts are tailored to meet the unique needs and circumstances of small employers, especially in higher hazard industries.
- develop regulatory strategies tailored, when appropriate, to the unique needs and hazards of Oregon industry.
- bring its strongest enforcement tools to bear on the most egregious and persistent violators.
Strategic Goal 1: Reduce serious workplace injuries and the risks that lead to them.
Strategic Goal 2: Reduce serious workplace illnesses and the risks that lead to them.
Strategic Goal 3: Reduce workplace deaths and the risks that lead to them.

<table>
<thead>
<tr>
<th>5-Year Performance Goal (1, 2, 3)-1: Recognition Programs or Voluntary Programs or Self-Sufficiency</th>
</tr>
</thead>
</table>
| **FY 2019 Performance Goal (1, 2, 3)-1** | Maintain the number of SHARP and VPP participants and continue to promote employer self-sufficiency through consultations and by encouraging employers to attain VPP and SHARP status. 
Oregon OSHA will promote SHARP and VPP through consultation, enforcement, technical services, and education. |
| **Indicators** | **Activity Measures**
1) Market VPP & SHARP through a variety of methods, including but not limited to working with the SHARP Alliance, news releases, and articles in the Oregon OSHA Resource newsletter. |
| | **Intermediate Outcome Measures**
2) Number of companies working toward SHARP recognition. 
3) Number of companies indicating an interest in VPP by requesting program information. |
| | **Primary Outcome Measures**
4) Number of employers who receive SHARP certification. 
5) Number of employers who receive VPP certification. |
| **Data Sources** | • Oregon OSHA SHARP database. 
• Oregon OSHA VPP database. |
| **Baseline(s)** | • Number of SHARP certified companies, including graduated sites as of FY 2014: 211 
• Number of VPP sites as of FY 2014: 20 |
| **Program Contacts** | • Roy Kroker, Oregon OSHA Consultation and Public Education Manager |
Strategic Goal 1: Reduce serious workplace injuries and the risks that lead to them.
Strategic Goal 2: Reduce serious workplace illnesses and the risks that lead to them.
Strategic Goal 3: Reduce workplace deaths and the risks that lead to them.

<td>8) Silica                                       16) Severe Violator Enforcement Program</td>
</tr>
<tr>
<td></td>
<td>17) Tethered Logging                            18) Preventing Heat Related Illness</td>
</tr>
</tbody>
</table>

**NOTE:** These totals may exceed total emphasis inspections due to multiple emphasis areas being addressed in an inspection.

*Oregon OSHA adopted the LEP Tethered Logging PD A-298 on 10/28/16.
*Oregon OSHA does not establish a set number of inspections for each emphasis program. Inspections are done for each emphasis program. If additional inspection efforts are needed in a given emphasis program, that is discussed and implemented through our management reviews.
