Oregon OSHA stickers and magnets

Directions for downloading and printing on home and business computer printers

Go to the Stickers and magnets page of the Oregon OSHA Web site, www.orosha.org, and browse through the available stickers to select the ones you want.

Downloading and saving stickers and magnets

For each sticker you wish to download, follow these steps:

- 1. Click on the JPG link below the image. This will open a new window that displays a full-size version of the sticker. (Depending on your browser settings, the image may appear much larger than the true dimensions.)
- 2. Position the mouse cursor over the image and right-click (PC) or click and hold (Mac), then select "Save picture as..."
- 3. Point the Save Picture window to the location you prefer on your computer or network. "My Pictures" or "My documents" or the desktop are typical choices. Click "Save."

Printing stickers and magnets

First, go to your local business supply store and obtain sticker paper suitable for your printer.

Then create the printable document following these steps. (The steps are for Microsoft Word, but should apply with minor adjustments to most word-processing applications.)

- 1. Create a new blank document (File>New>Blank document)
- 2. Click Insert>Picture>From file. Navigate to the folder where you saved the sticker's .jpg file. Click "Insert." The sticker image will appear on the page.
- 3. Print, taking care that the sticker paper is loaded so that the image prints on the correct side of the paper. (This varies by printer, so check your printer's manual for how to load sticker paper, or experiment using plain paper.)

Printing multiples

If you are planning to print multiple stickers, either the same or different images, you'll make more efficient use of your sticker paper by placing the images in a table so they are spread evenly across the page.

The number of stickers that fit onto a page varies by sticker size. For example, an 8.5x11 page will hold four of the 4.25x3.25-inch Emergency Information sticker, in two rows by two columns (see Figure 1, below). The same page will hold 12 of the 1.75-inch Safety Committee stickers in three columns and four rows (See figure 2, below).

You can also mix stickers to create a page with a variety of stickers (See Figure 3).

About magnets

Any of the stickers can be made into magnets by purchasing a magnet printing kit from a business supply store and following directions for printing.

EMERGENCY INFORMATION

Ambulance	
Hospital	
Sheriff/Police	
Fire Dept.	
Your location	
First-aid person(s)
