Changes Adopted - Agriculture
Respiratory Protection Standard

A new Respiratory Protection standard was adopted in Division 4/I, Agriculture. OAR 437-004-1041, Respiratory Protection was adopted as OR-OSHA Administrative Order 3-2006 on June 7, 2006, but will not be effective until March 1, 2007.

The current 437-004-1040, Respiratory Protection will remain in effect through February 28, 2007.

Oregon OSHA will have both standards on the web site and in hard copy until March 2007.

The Respiratory Protection Standard was reworded for clarity and plain language, and to bring the rules up to Division 2/I standards having one rule for all respirator users.

Summary of changes:
- There are new requirements for voluntary use of respirators. You must provide respirator users with the information contained in Appendix D, and have a medical evaluation required for respirators with the exception of filtering facepieces, and have cleaning, storing and maintenance procedures in the program.
- There is a requirement for annual fit-testing of required use of respirators.
- There is a change from annual medical evaluations to a medical evaluation before the first fit-test.
- New appendices A, B1, B2 and D were added for procedures on fit-testing (A), user seal check (B1) and proper cleaning (B2) the medical questionnaire was moved to (C) and voluntary use information (D). The mandatory appendices C and D are also in Spanish.
- There is a section on interior structural firefighting requiring the two in two out rules.
- Training is required annually.
- A change out schedule for canisters and cartridges is required.
Please visit OR-OSHA’s web site: www.orosha.org for proposed, adopted and final rules, as well as current publications, training opportunities, and much more.
