Oregon OSHA – Adopted Changes to Eye and Face Protection Consensus Standards in General Industry, Construction, and Maritime Activities

This rulemaking is to keep Oregon OSHA in harmony with recent changes to Federal OSHA's standards.

Some Oregon OSHA general industry, maritime and construction rules for personal protective equipment reference ANSI consensus standards Z87.1-1989 and Z87.1-1968. This rulemaking removes those older standards and will recognize ANSI/ISEA Z87.1-2010, ANSI Z87.1-2003, and ANSI Z87.1-1989 (R-1998).

The ANSI/ISEA Z87.1-2010 provides requirements for the selection, testing, use, and maintenance of protectors intended to minimize or prevent eye and face injuries including impact, non-ionizing radiation, and chemical exposures in occupational and educational environments. ANSI Z87.1-2003 and ANSI Z87.1-1989 (R-1998) are prior versions of this standard which are also incorporated by reference as alternative means of compliance with Oregon OSHA's eye and face protection requirements.

Oregon initiated PPE rules in Division 2, general industry and Division 3, construction are amended with the ANSI updates, as well as references in Oregon Rules for Firefighters in Division 2/L.

This is Oregon OSHA Administrative Order 3-2016, **adopted and effective September 7, 2016.**
