Changes Adopted – Division 2/L Oregon Rules for Fire Fighters

In late 2003 Oregon OSHA discovered that the requirements for live fire training, in OAR 437-002-0182(10)(c), are not usable, and in fact, don't exist. The Oregon State Fire Marshal's standard (OAR 837-010-0070(3)(b)(c) and (d)), referenced in Oregon OSHA's rule, was repealed several years ago, and no other standard has been adopted in its place.

OR-OSHA contacted some fire departments, and DPSST to review a variety of programs for live fire training. It became clear that the programs, though different, were usually based on the NFPA standard for live fire training. Oregon OSHA decided to ask for assistance from the Oregon OSHA Fire Fighters Advisory Committee (a standing committee with representatives from various parts of the Fire Service) to select, or develop a standard for live fire training. The first meeting was held in March 2004, followed by five more meetings, ending in November. The Committee based the development of a new standard, focused on occupational safety and health of fire fighters during live fire training, on NFPA 1403, Live Fire Training. Acceptable sources of ignition became a major topic. A petition for the use of drip torches was sent to the NFPA 1403 Subcommittee on Ignition Sources. The subcommittee agreed that ignition sources need to be addressed in the next (2007) draft of NFPA 1403. Unofficial acceptance by the subcommittee was given for the use of fusees. After further studying the use and safety of drip torches, the Oregon OSHA Fire Fighters Advisory Committee recommended allowing use of drip torches in the standard. Another major topic for discussion was calculation of water supply. Consensus of the committee was to use the calculations of NFPA 1142, 2001 edition, for the minimum water supply.

Adopted amendments are in Division 2/L, Oregon Rules for Fire Fighters standard OAR 437-002-0182(10)(c) and a new mandatory Appendix C to 437-002-0182(10)(c), Minimum Requirements for Live Fire Training.

This is OR-OSHA Administrative Order 3-2005, **adopted and effective June 10, 2005.**

RULE SUMMARY

In late 2003 Oregon OSHA discovered that the requirements for live fire training, in OAR 437-002-0182(10)(c), are not usable, and in fact, don't exist. The Oregon State Fire Marshal's standard (OAR 837-010-0070(3)(b)(c) and (d)), referenced in Oregon OSHA's rule, was repealed several years ago, and no other standard has been adopted in its place.

OR-OSHA contacted some fire departments, and DPSST to review a variety of programs for live fire training. It became clear that the programs, though different, were usually based on the NFPA standard for live fire training. Oregon OSHA decided to ask for assistance from the Oregon OSHA Fire Fighters Advisory Committee (a standing committee with representatives from various parts of the Fire Service) to select, or develop a standard for live fire training. The first meeting was held in March 2004, followed by five more meetings, ending in November. The Committee based the development of a new standard, focused on occupational safety and health of fire fighters during live fire training, on NFPA 1403, Live Fire Training. Acceptable sources of ignition became a major topic. A petition for the use of drip torches was sent to the NFPA 1403 Subcommittee on Ignition Sources. The subcommittee agreed that ignition sources need to be addressed in the next (2007) draft of NFPA 1403. Unofficial acceptance by the subcommittee was given for the use of fusees. After further studying the use and safety of drip torches, the Oregon OSHA Fire Fighters Advisory Committee recommended allowing use of drip torches in the standard. Another major topic for discussion was calculation of water supply. Consensus of the committee was to use the calculations of NFPA 1142, 2001 edition, for the minimum water supply.

Adopted amendments are in Division 2/L, Oregon Rules for Fire Fighters standard OAR 437-002-0182(10)(c) and a new mandatory Appendix C to 437-002-0182(10)(c), Minimum Requirements for Live Fire Training.
