Conference Information and Services

Who should attend

All those responsible for the prevention of injuries and illnesses in the workplace, including safety and health professionals, safety committee members, managers, supervisors, human resource professionals, employees, owners, and other interested persons.

Registration

Early registration is encouraged. **Register online at safetyseries.cventevents.com/southern26.** Registrations also accepted by mail and scan/email. Checks, purchase orders, and credit card are accepted for registrations. If space is available, you may register at the conference.

Pre-registration deadline October 6, 2026

To register by mail, complete the conference registration form and make your check or purchase order payable to:

ASSP Southern Oregon Conference

PO Box 5640
Salem, OR 97304-0640
Fax: 503-947-7019

You can also register online at
safetyseries.cventevents.com/southern26

A unique email address is required for confirmation.
No duplicate emails.

Co-sponsorship of this conference by the Southern Oregon Chapter of the American Society of Safety Professionals (ASSP) and Oregon OSHA does not necessarily constitute endorsement or approval of the content of programs. Employers and employees should review applicable rules and regulations to ensure that the information they have received is appropriate to their specific worksite and work situation. ASSP is financially responsible for conference arrangements and commitments.

Schedule-at-a-glance

Tuesday, October 13

Pre-conference Certification Workshops

7:30-11:30 a.m. CPR, AED, and First Aid

1-5 p.m. Flagger Certification for Temporary Traffic Control for Short-Term Work Zones

Professional Development Workshop

8 a.m.-3 p.m. Safety Live! (Part 1) and Selling Safety to Management (Part 2)

Wednesday, October 14

7:30 a.m. Registration opens and refreshments

7:30 a.m.-3:30 p.m. Exhibits open

8-9:45 a.m. Welcome and Keynote: On the Brink: Recognizing Disaster Before You Step Off the Cliff

9:45-10:30 a.m. Break and Visit Exhibits

10:30 a.m.-noon

SESSION 1

- Foundation of Trust
- From Compliance to Commitment: Building Engaged Safety Committees
- Safety and Health Compliance Made Simple: One-page Tools for HR and Safety Professionals
- Drugs of Abuse
- Prequalifications in Construction

Noon-1:15 p.m. Lunch (provided), Visit Exhibits, Prize drawing (12:30 p.m.)

1:15-2:45 p.m.

SESSION 2

- Incident Analysis
- How to Motivate Business Leaders to Support Safety
- Say What? Hearing Conservation Programs and What You Didn't Want to Hear About Them
- 2026 Employment Law Update
- Construction A to Z

2:45-3:30 p.m. Break and Visit Exhibits

3:30-5 p.m.

SESSION 3

- Civility in the Workplace: Because How We Treat Each Other Is the Work
- Is That Confined Space Permit Required? Yes or No?
- I See Hurt People – Part 1: Basics of Hazard Awareness
- The 'Now' Gap: Predicting Workplace Injury Risk and Addressing Discomfort Before Injury

5-6:30 p.m. Networking Event (limited seating – admission ticket required)

Schedule-at-a-glance

Thursday, October 15

- 7:30 a.m.** Registration opens and refreshments
- 7:30 a.m.-1:15 p.m.** Exhibits open
- 8-9:05 a.m.** Welcome and Keynote: The University of You: The Crash Course
- 9:05-10 a.m.** Awards Presentation
- 10-10:30 a.m.** Break and Visit Exhibits

10:30 a.m.-noon

SESSION 4

- Employee Speech and Expression in the Workplace – Law, Politics, and Best Practices
- Building a Safety Mindset
- Safety Committees: Improve the Buy-in and the Involvement of Your Teams by Listening
- Hands-on Noise Monitoring for the Nonindustrial Hygienist
- Health Hazards in Construction

Noon-1 p.m. Lunch (provided), Visit Exhibits, Prize drawing (12:20 p.m.)

1-2:30 p.m.

SESSION 5

- Top Fire Safety Challenges in the Workplace
- From Bystander to Upstander: Building Teams That Speak Up
- Effective Accountability Systems
- From Heroes to Systems: Transitioning From Individual Safety Ownership to the ANSI/ASSP Z10.0 Safety Management System Standard
- It is Getting Hot in Here

2:30-2:50 p.m. Break

2:50-4:20 p.m.

SESSION 6

- Building a Better Safety Brand – Design the One You Want Others to Experience
- Modern Methods for Controlling Health Premiums
- I See Hurt People – Part 2: The Sixth Sense of Hazard Awareness and Mitigation
- Developing Resilient Environments Through Psychological Safety
- Fall Protection Basics

Conference Workshops

Tuesday, October 13

7:30 a.m.

Registration opens

Pre-conference Certification Workshops

8 a.m.-noon

CPR, AED, and First Aid

Get your two-year certification in CPR/first aid and learn the skills of high-quality CPR, including chest compressions, rescue breathing, and automated external defibrillator (AED) usage. Learn first-aid skills, including, but not limited to, bleeding control, running a scene of an accident, and identifying and responding to certain medical issues, among others.

► **Roy Harper**

Risk & Safety Consultant

Barrett Business Services (BBSI), Medford

► **Jeffrey Mook**

Region Safety Coordinator

Boise Cascade, Medford

1-5 p.m.

Flagger Certification for Temporary Traffic Control for Short-Term Work Zones

Workers face many safety issues as they set up and take down work zones, a fact that justifies the need for simplified traffic control procedures for short-term activities. This class covers standards and practices for temporary traffic control work zones that are in place continuously for three days or less on public roads in Oregon. Enroll in this class to:

- Receive three safety training manuals, which are yours to keep.
- Take an open-book test at the end of the session.
- Receive a flagger certification card that is valid for three years from the date it's issued.

► **Thom Kneeland**

Safety Technician

Jackson County, White City

Professional Development Workshop

8 a.m.-3 p.m.

Safety Live! (Part 1) and Selling Safety to Management (Part 2)

Part 1 (8 a.m.-noon): This is a dynamic four-hour interactive workshop designed for managers, supervisors, and safety professionals aiming to elevate their leadership approach to effective safety and security programs. It connects the art of leadership, neuroscience, change management, and systemization to build a highly reliable organization.

► **Ron Havniear, Prosci Train the Trainer Level 2**

CEO

Advance Security & Leadership, Gold Hill

Part 2 (1-3 p.m.): "Because it's the right thing to do" is rarely enough to secure resources and support for safety improvements. Leaders are often balancing competing priorities, limited budgets, and operational demands, so being able to communicate safety in terms that resonate with business decision-makers is essential. This workshop explores how to gather meaningful data, evaluate solutions, and frame recommendations around risk reduction, operational performance, and organizational value. Participants learn practical methods for building persuasive business cases, presenting compelling evidence, and gaining management buy-in for safety initiatives. Leave with proven strategies for turning good safety ideas into proposals that earn attention, support, and action.

► **Luke Betts, CSP, ARM-E, ASP, AIS**

Senior Safety Management Consultant

SAIF Corporation, Bend

KEYNOTE

On the Brink: Recognizing Disaster Before You Step Off the Cliff

What happens when an operation reaches the point where one more decision, one missed warning, or one overlooked risk could change everything?

This keynote examines Operation Spartan Pegasus and the critical moments when safety teams, comprehensive risk management, and decisive leadership transformed a potentially catastrophic situation into operational success. Through the lens of real-world events, we explore how organizations can recognize emerging danger, identify the warning signs that precede disaster, and create the conditions for people to make sound decisions before they reach the point of no return.

The presentation goes beyond traditional safety practices to examine the intersection of leadership, situational awareness, communication, risk tolerance, and organizational culture. Attendees leave with better awareness for identifying risk earlier, challenging assumptions, empowering safety professionals, and making difficult decisions when the consequences are high.

- ▶ **Jeff Crapo, MS**
Owner, Instructor, Colonel (Retired)
Ethos Academy, Phoenix

9:45-10:30 a.m. Break and Visit Exhibits

10:30 a.m.-noon

SESSION 1

Foundation of Trust

GI

Safety leadership begins with trust. As leaders within your organization, you understand the effect trust has on your ability to lead safety effectively. As leaders, we need to know how to build trust and how to gain buy-in from our peers and the employees we work with each day. At the end of this session, you measure your trust-building ability and walk away with tools to use in your organization.

- ▶ **Ramiero Leon**
Safety Professional
Vigilant, Tigard

From Compliance to Commitment: Building Engaged Safety Committees

SC

This interactive training introduces participants to the purpose, expectations, and value of safety committees and safety meetings. The session begins with a whole-group, compliance-focused Q&A to establish a shared understanding of Oregon OSHA expectations. After clarifying minimum requirements, the session expands to include what award-recognized “Best of the Best” safety committees do differently.

Participants move from compliance to commitment by examining engagement, follow-through, and prevention-focused practices that distinguish high-performing committees. The format is discussion-based and practical, designed for mixed groups of employees, supervisors, managers, and safety committee members.

► Jon Sowers, OHST, CHST, CET, SMS

*Senior Safety Management Consultant
SAIF Corporation, Medford*

Safety and Health Compliance Made Simple: One-page Tools for HR and Safety Professionals

HR

Most businesses know they need safety programs, but they aren’t always sure about where to start or how to identify what’s missing. This session introduces a set of practical one-page handouts designed to help human resources and safety professionals quickly identify required programs and take the first simple steps toward compliance.

These tools were designed to remove guesswork and reduce the feeling of being overwhelmed. Each tool focuses on a single topic and answers two key questions: “Do we need this?” and “What’s a simple way to get started?” Participants leave with an approach they can use immediately with their teams or clients.

► Shelley Nasby, CSP, MBA

*Senior Safety Management Consultant
SAIF Corporation, North Bend*

► Angie Wisher

*Senior Safety Management Consultant
SAIF Corporation, Lake Oswego*

Drugs of Abuse

HW

Poison centers are often the first source to recognize dangerous trends in poisoning. Fentanyl along with methamphetamine and marijuana are common drugs of abuse in Oregon. Join Annie Duncan, a registered nurse and certified specialist in poison information, to learn how the Oregon Poison Center (OPC) can help with exposure to drugs of abuse. You also learn how to identify the symptoms and exposure routes for these drugs, as well as how to:

- Define poisoning and exposure routes.
- Identify OPC’s role in poisoning/drug exposures.
- Recognize the symptoms of fentanyl and methamphetamine abuse.
- Recognize the symptoms of marijuana exposure in young children.

► Anne Duncan, BSN, RN, CSPI

*Interim Director
Oregon Poison Center, Portland*

Prequalifications in Construction

C

This talk delves into the critical process of prequalifications in the construction industry, a vital step that ensures only the most capable and reliable contractors are selected for projects. Participants gain insights into the criteria and standards used to evaluate potential contractors, the importance of prequalifications in mitigating risks, and their effect on project success. The session covers best practices, common pitfalls, and the role of technology in streamlining the prequalification process. Through case studies and interactive discussions, attendees learn how to implement effective prequalification strategies that enhance project outcomes and foster strong partnerships in the construction sector.

► Robert McCarthy, CSP, SMP, OHST, CSMP

*Occupational Safety and Health Manager
U.S. Navy, Honolulu, Hawaii*

Noon-1:15 p.m.

Lunch (provided)

1:15-2:45 p.m.

SESSION 2

Incident Analysis

SC

Incident analysis is the foundational activity of any effective safety program. We discuss key insights into what it takes to make sure your organization learns from events to make sure everyone goes home safe. Companies that analyze incidents well and learn the lessons they teach have better safety performance across the board. The speaker teaches a systems approach that helps you realize near-miss incidents are an important opportunity for your company to improve. This is a great class for safety committee members, supervisors, and managers alike.

- ▶ **David Hanson, CSP**
Senior Safety Management Consultant
SAIF Corporation, Medford

Awards Presentation**Thursday, October 15**

9:05-10 a.m.

Ashland Hills Hotel & Suites

This is an occasion for ASSP to recognize safety excellence and improvement and to thank corporate sponsors for supporting efforts to provide health and safety education opportunities in Southern Oregon.

How to Motivate Business Leaders to Support Safety

GI

In today's fast-paced business environment, the importance of safety in the workplace cannot be overstated. This session aims to equip participants with the knowledge and strategies necessary to effectively engage and motivate business leaders to prioritize safety within their organizations. Through a combination of research-backed insights, real-world case studies, and interactive discussions, attendees learn how to communicate the value of safety not just as a regulatory requirement, but as a critical component of organizational success and employee well-being.

Participants explore the psychological and economic benefits of a strong safety culture, understand the barriers that often prevent leaders from prioritizing safety, and discover practical approaches to influence decision-makers. By the end of the session, attendees are empowered to advocate for safety initiatives that align with business goals, which ultimately foster a safer and more productive workplace.

- ▶ **Robert McCarthy, CSP, SMP, OHST, CSMP**
Occupational Safety and Health Manager
U.S. Navy, Honolulu, Hawaii

Say What? Hearing Conservation Programs and What You Didn't Want to Hear About Them

IH

Federal OSHA General Industry standards require a hearing conservation program if the noise in the work area measures greater than 85 decibels. 1910.95 (Subpart G) outlines what a program should contain and how to set one up. This is one of the few programs that can protect your team from an occupational illness that is 100 percent preventable. OAR 437-004-0630 follows the same basic requirements.

2026 Employment Law Update

HR

In this presentation, Barran Liebman Partner discusses key employment laws and considerations for employers of all sizes and industries in 2026. Topics include employee safety, risk management, new laws, and policy considerations. Chris helps employers understand how each of these items affect employer responsibilities and obligations, and provides practical advice for implementing new policies in a changing legal and regulatory landscape, including:

- Understanding new or amended laws which impact employers.
- How to update policies to comply with changing legislation.
- How to mitigate risk through proactive policy development and implementation.
- Understanding employer responsibilities in responding to and addressing workplace safety complaints.

► Chris Morgan, Attorney

Partner

Barran Liebman LLP, Portland

Construction A to Z

C

From accident investigations to zero-energy maintenance programs, the alphabet has us covered when it comes to construction health and safety. This lively session reviews the many hazards commonly found in construction and demolition, as well as the best practices (and Oregon OSHA requirements) designed to correct those hazards. Several Oregon case studies involving construction-related injuries and deaths are also presented.

► Craig Hamelund

Education Specialist

Oregon OSHA, Tigard

2:45-3:30 p.m.

Break and Visit Exhibits

3:30-5 p.m.

SESSION 3

Civility in the Workplace: Because How We Treat Each Other Is the Work

HR

Civility isn't about being nice. It's about being brave enough to choose respect – even when it's hard; even when you're exhausted; and even when the person across from you feels impossible. In this session, we get honest about what incivility actually costs – not just in morale, but in safety, retention, and the kind of trust that takes years to rebuild. Participants walk away with a real framework, practical tools, and something rarer than most training provides – a genuine shift in how they see the people around them. This isn't a lecture. It's a conversation your team has needed for a long time.

► Kristi Frederick, MPS OD&C

Leadership & Culture Coach

Certified Dare to Lead™ Facilitator

Omnia Vincit Amor, Medford

Is That Confined Space Permit Required? Yes or No?

GI

Industrial facilities and construction sites have a wide variety of enclosed areas within which workers may perform a wide variety of work tasks. The safety standards that would apply to each of these spaces depend on how they are identified and classified by the employer. Confined spaces (both permit and nonpermit required), enclosed spaces, confined spaces under the welding standard, and other enclosed areas all have slightly different definitions and safety standards. In this session, we analyze all the different categories of enclosed spaces and see what standards apply to each along with best practices for protecting entrants and responding properly in the event of an emergency.

► Jim Johnson

CEO

D2000 Safety, Inc., Eugene

I See Hurt People – Part 1: Basics of Hazard Awareness

SC

This session helps provide safety practitioners with the tools and skills needed to see conditions in the workplace with a different lens. Many hazards can lie dormant until the perfect storm of circumstances come together to cause harm. Attendees learn to not only “see” injuries before they occur, but they also learn proven methods for controlling and mitigating the hazards that cause them.

The ‘Now’ Gap: Predicting Workplace Injury Risk and Addressing Discomfort Before Injury

HW

Most workplace safety programs focus on preventing future incidents or responding after an injury occurs, leaving a critical gap when employees are experiencing fatigue, soreness, or discomfort today. This session examines how organizations can identify developing injury risk by evaluating job demands, fatigue patterns, and where physical overload is most likely to occur. Attendees also learn how early reporting and on-site support can address discomfort before it progresses into injury. Through practical examples and interactive demonstrations, participants explore job-specific movement and recovery strategies that can be applied in industrial, repetitive, physically demanding, and office-based environments. Attendees leave with actionable ideas for strengthening early reporting, supporting OSHA-aligned, first-aid interventions, and improving existing safety and ergonomic programs.

The University of You: The Crash Course

Every one of us is enrolled in a lifelong education, learning through victories, setbacks, and everything in between. But what if the most important subject you ever study is yourself? In this presentation,

participants explore how to identify opportunities for growth, leverage their unique strengths, and make peace with the imperfections that shape who they are. By reframing challenges as lessons and setbacks as tuition payments, attendees gain practical tools for building confidence, resilience, and authenticity. Because graduation isn't about becoming someone else; it's about becoming more fully yourself.

SESSION 4

Employee Speech and Expression in the Workplace – Law, Politics, and Best Practices

HR

Discussions regarding social and political events are finding their way into the workplace more than ever before. Whether at the office, off-site, or on social media – how can (or should) employers respond to potentially problematic employee speech? In this presentation, Barran Liebman Partner Chris Morgan discusses best practices for limiting legal liability and balancing employee rights with policies that foster a safe, respectful, and productive work environment.

Key topics include:

- Distinguishing which free speech rights do or don't exist in the workplace.
- Identifying protected classes (such as religion) which can be implicated by employee speech.
- Recognizing activities which trigger an employer's duty to act under the law.
- Implementing best practices for managing employee conflict which arise out of controversial speech or activity.
- Drafting neutral policies related to employee speech.

► **Chris Morgan, Attorney**

Partner

Barran Liebman LLP, Portland

Building a Safety Mindset

GI

In an era where workplace safety is paramount, fostering a safety mindset among employees is essential for creating a proactive safety culture. This talk focuses on the importance of instilling a safety-first mentality within organizations, emphasizing that safety is not just a set of rules but a fundamental value that should be embraced by everyone. Participants explore the psychological aspects of safety behavior, learn how to identify and mitigate risks, and discover effective strategies for encouraging employees to take ownership of their safety responsibilities.

Through engaging discussions, real-life examples, and interactive activities, attendees gain insights into how to create an environment where safety is prioritized and integrated into daily operations. By the end of the session, participants are equipped with the tools and knowledge necessary to promote a lasting safety mindset within their teams.

► **Robert McCarthy, CSP, SMP, OHST, CSMP**

Occupational Safety and Health Manager

U.S. Navy, Honolulu, Hawaii

Safety Committees: Improve the Buy-in and the Involvement of Your Teams by Listening

SC

Effective safety committees take planning and organization. Our teams want to be able to do their work, receive training on new tasks and tools, and to be listened to by the supervisorial staff. One of the best ways to make that happen is to use the structure of the safety committee to encourage conversation and establish a strong mutual bond between employees and the employer. Being focused on mutual goals and working cooperatively moves the entire company forward to a safety culture that benefits everyone. Let's talk about how we can listen to each other and make this work even better than it does now.

Hands-on Noise Monitoring for the Nonindustrial Hygienist

IH

This session allows the nonindustrial hygienist to learn about noise monitoring equipment. Participants have the opportunity during hands-on exercises to use noise dosimeters. Included is the ability to calibrate and use industrial hygiene noise monitoring equipment, identifying where to seek additional instruction in the use of noise monitoring equipment, and how to recognize when to seek help with complex noise surveys.

- ▶ **Dan Stuckrath, CIH, CSP**
Industrial Hygienist
SAIF Corporation, Salem

Health Hazards in Construction

C

Are you familiar with the main health hazards in construction, the most frequent poisoning related to poor hygiene, or the newest regulatory requirements requiring personal protective equipment and a written safety program? What is the frequent health hazard that may cause death from exposure, or the issue that most commonly causes skin issues? This course discusses the primary health hazards on the construction site and the regulatory requirements that accompany them.

SESSION 5

Top Fire Safety Challenges in the Workplace

GI

This session explores the most common fire safety risks facing today's workplaces with a focus on prevention, preparedness, and practical response strategies. Participants review key challenges such as housekeeping, electrical hazards, storage practices, equipment use, employee awareness, and emergency

coordination. The class also explains how the fire department operates, including response roles, incident priorities, and how workplace personnel can better support emergency operations before, during, and after an incident. Attendees leave with practical tools to identify hazards, strengthen everyday safety practices, and build a more fire-resilient workplace culture.

- ▶ **Devon Brown**
Deputy Chief of Professional Standards
Medford Fire Department, Medford
- ▶ **Tanner Fairrington**
Deputy Fire Marshal III
Medford Fire Department, Medford

From Bystander to Upstander: Building Teams That Speak Up

HR

This session helps attendees to identify the psychological and organizational factors that contribute to bystander behavior and prevents employees from speaking up when they witness workplace concerns. We analyze the effect of upstander behavior on workplace culture, psychological safety, employee trust, and organizational effectiveness. Learn to apply practical communication strategies and a structured framework to safely intervene and address inappropriate behavior. Also learn how to support colleagues in real-world situations and develop actionable approaches for fostering a workplace culture that encourages respectful communication, accountability, and the confident reporting of concerns.

Effective Accountability Systems

SC

Tired of finger pointing and the blame game going on at work? Want to learn effective methods for holding the workforce accountable for health and safety? Would you like to improve morale and learn ways to motivate staff toward improved safety and health performance? This informative session helps you accomplish these objectives by covering the elements of an effective accountability system, explaining how to implement and maintain an effective accountability program, and providing insight into the psychology behind workplace behaviors.

From Heroes to Systems: Transitioning From Individual Safety Ownership to the ANSI/ASSP Z10.0 Safety Management System Standard

GI

This presentation provides a practical road map for transitioning from a reactive, "safety hero" model in which safety performance depends on individual effort to a sustainable, systems-driven approach aligned with ANSI/ASSP Z10. Attendees gain a clear understanding of the core elements of Z10, including leadership commitment, employee participation, hazard identification, risk assessment, continuous improvement, and how these elements integrate into daily operations. The session highlights common gaps organizations face when relying on individual ownership and demonstrate how to build structured processes that drive consistency, accountability, and measurable results. Through real-world examples and implementation strategies, participants learn how to engage supervisors as safety leaders, establish meaningful leading indicators, and create systems that sustain performance beyond any one

person. By the end of the session, attendees are equipped with actionable steps to strengthen their safety management systems and elevate overall organizational safety culture.

► Luis Ortiz

*Founder, CEO
Safety First Management, LLC, Long Beach*

It is Getting Hot in Here

IH

The class reviews the fine details of the Oregon OSHA heat illness prevention regulation. We look at examples where employers have struggled to comply and instances where employers have implemented creative solutions. We also examine the contributing factors for heat illness on jobsites and discuss a recent fatality due to heat stroke. Attendees are encouraged to ask questions related to heat illness compliance or for clarifications on requirements.

► Brandi Davis, MS, CSP, CIH

*Health Enforcement Manager - Industrial Hygienist
Oregon OSHA, Tigard*

2:30-2:50 p.m.

Break

2:50-4:20 p.m.

SESSION 6

Building a Better Safety Brand - Design the One You Want Others to Experience

GI

Every safety professional has a safety brand – whether they realize it or not. The question is: What does your brand say about you?

Just as organizations build reputations through repeated experiences, safety professionals build a safety brand through communication, consistency, visibility, and behavior under pressure. Regardless of technical skill or experience, the way people experience you influence their trust, engagement, and safety outcomes.

This session challenges participants to think beyond compliance and explore how their safety brand shapes workplace relationships and culture. Attendees identify their current brand, define the brand they want to project, and develop intentional strategies to strengthen it over time.

Attendees leave with a personalized safety brand action plan and a new perspective on how intentional behavior influences trust, leadership presence, communication, and safety culture far beyond rules and regulations.

- ▶ **Jeffrey Mook**
Region Safety Coordinator
Boise Cascade, Medford

Modern Methods for Controlling Health Premiums

HR

Employers continue to face rising group health insurance premiums and increasing complexity in managing employee benefit plans. This session explores creative, alternative strategies for controlling healthcare costs while also addressing the compliance risks that can create significant financial and administrative exposure for employers.

Through practical examples and an annual compliance checklist, attendees gain actionable strategies for evaluating their current benefit programs, identifying potential compliance gaps, reducing administrative risk, and developing a more proactive approach to controlling both healthcare costs and compliance exposure.

I See Hurt People – Part 2: The Sixth Sense of Hazard Awareness and Mitigation

SC

Take your hazard identification skills to the next level in this intermediate-to-advanced session. Building on your foundation of great safety inspections, a functioning hazard reporting system, and incident analysis, you explore tools such as hazard analysis, risk assessment, and risk mapping to uncover serious and often overlooked risks. Learn how to “see” hidden dangers, prioritize what matters most, and influence leadership to take action that drives real results.

Developing Resilient Environments Through Psychological Safety

HW

Building resilient organizations and employees requires more than individual coping skills – it demands systems that make safe, sustainable work possible. This session explores how psychological safety acts as a force multiplier for resilience, using the NIOSH Total Worker Health® and Worker Well Being frameworks to connect leadership behavior, work design, policies, and safety climate. Participants learn practical leader behaviors that encourage speaking up, surface risk early, and turn everyday disruptions into learning opportunities rather than burnout.

Conference Sessions

Fall Protection Basics

C

This 90-minute training course provides a basic overview of fall protection principles to help employees recognize and reduce fall hazards in the workplace. The session is designed for workers who may be exposed to elevated work conditions and need a foundational understanding of safe work practices.

Topics include identifying common fall hazards, understanding when fall protection is required, and recognizing the key components of fall protection systems, such as guardrails and personal fall arrest systems.

A hands-on harness inspection is used to reinforce learning. Participants practice inspecting full-body harnesses for signs of wear, damage, and other safety concerns. This interactive exercise helps build confidence in identifying defective equipment and ensures workers understand the importance of inspecting gear before each use.

By the end of the training, participants have a basic understanding of fall protection requirements and are better prepared to identify hazards and use equipment safely on the job.
