# Public Education Class Descriptions

Workshop Schedule  
July - Dec. 2023

All classes are scheduled for 4 hours.

*Attending an Oregon OSHA class helps you gain important knowledge and skills. The certificate should not be considered formal Oregon OSHA certification of professional competencies or qualifications.*

## Fall Protection

This class will discuss the Oregon OSHA rules for fall protection use in the construction industry and will provide specific tools to build a pro-active safety program. Falls are consistently one of the top ten injuries in Oregon and cost employers millions of dollars each year. The goal of the class is to increase personal knowledge about how to prevent falls.

## Forklift Safety

You will learn about the Oregon OSHA rules for Powered Industrial Trucks and developing a forklift training program. This class does not offer forklift operator certification (cards).

## Hazard Communication – Aligned with GHS

You will learn how to: write a hazard communication program, complete a chemicals list, conduct employee training, and analyze container labels and Safety Data Sheets (SDS). This how-to workshop guides you through developing and implementing an effective hazard communication program. Provides 3 credits toward recertification of Oregon certified pesticide applicator licenses.

## Hazard Identification and Control

You will learn about: the types of workplace hazards, hazard correction, developing an inspection checklist for the walk-around inspection, and writing an effective safety inspection report. This class builds on the hazard identification and hazard control modules that are included in Oregon OSHA's introductory class Safety Meetings and Committees.

## Job Hazard Analysis (JHA)

You will learn how to: determine which jobs need a JHA, write an effective safe job procedure, and use the JHA to improve safety programs. Conducting JHAs is required for all companies intending to achieve Safety and Health Achievement Recognition Program (SHARP) certification.

## Lockout/Tagout and Machine Safeguarding

This two-part workshop reviews the requirements found in the Oregon OSHA rules, the Control of Hazardous Energy (Lockout/ Tagout), and Machinery and Machine Guarding.

## Lockout/Tagout

You will learn about the purpose and scope of the lockout/tagout standard; lockout and tagout procedures; training criteria; and periodic inspection criteria.

## Machine Safeguarding

You will learn about Oregon OSHA machine guarding requirements; hazardous motions and actions; guards and devices; and training guidelines.

## Safety and Health Management Principles

You will learn: why a safety and health management system is important, become familiar with the 7 core elements of an effective safety and health management program, and learn about best practices and overcoming obstacles.

## Safety Meetings and Committees

This introductory class discusses the role and purpose for the safety meeting and/or committee; employer and employee responsibilities; and safety committee training requirements.

## What to Expect from an Oregon OSHA Inspection

You will learn about: Oregon OSHA services, employee/ employer and compliance officer rights and responsibilities, and how and why inspections are conducted. This class helps take the mystery out of the Oregon OSHA compliance inspection process.

## Worker Protection Standard

Protection for Pesticide Handlers and Workers: You will learn about the Environmental Protection Agency's (EPA) Worker Protection Standard (WPS), along with Oregon OSHA's unique requirements related to the standard. The WPS applies to people who work on farms, in forests, nurseries, greenhouses, or other locations that use pesticides.

# Public Education Directions

Workshop Schedule

July - Dec. 2023

## BOARDMAN

**Blue Mountain Comm. College • Workforce Training Center (Room 3) • 251 N Olson, Boardman, OR 97818 • 541-481-2099**
